Choosing Quality Child Care

The first five years of a child's life are critical learning years.

Consider these tips as you search for a safe, high quality learning environment where your child can grow and thrive:

Learning

- Are the play spaces organized with age-appropriate toys and books, puzzles and blocks easy to reach and use?
- O Does the child care program offer both structured and unstructured play time daily?
- O Do providers frequently read and sing to children throughout the day?
- O Does the child care program allow screen time? (National guidelines recommend children less than 2 years old have no screen time. For children 2 years and over the total screen time is less than thirty minutes each week, for educational or physical activity use only. This includes home and child care settings.)

Program Enrichment

- O Does the child care program participate in Montana's Best Beginnings STARS to Quality?
- O Is the program accredited by a national organization? Accreditation indicates the program has been recognized by a leading national organization for providing excellent care.
- O Does the program participate in the Federal food program (Child and Adult Care Food Program)?

Supervision

- Are children supervised at all times, including when they are sleeping?
- Are teachers warm, welcoming and interacting with each
- Are clear and simple safety rules established with the children?
- O Do teachers focus on positive, clear, consistent and fair quidance?
- Are there enough staff-members to supervise all children? See the recommended guidelines for adult-to-child ratios in child care centers on the reverse side.*

Health and Safety

- O Do teachers follow standards for health and safety, including proper hand washing, diapering, and toileting?
- O Is someone always present who has current pediatric (infant/child) CPR and pediatric first aid training?
- O Is there a plan for responding to disasters (fire, flood, etc.)?
- O Do the children go outside every day unless the weather or conditions don't support outdoor time?
- O Is the playground regularly inspected for safety?
- O Does the child care program support breastfeeding?
- O Are infants held by adults during feeding?
- O Does the child care program serve meals?

Professional Development

- O Do the teachers and director have a credential or an early childhood-related degree?
- O Have the Director and teacher(s) had specific training on children's development and experience caring for children?
- O Do the directors and teachers receive early childhoodrelated training or education?

Communication

- Are parents always welcome in the home or center and given a copy of the program's policies?
- Are annual conferences or regular and consistent communication held with parents?

Adult-to-Child Ratios¹

The following chart represents the adult to child ratios for all licensed child care types in Montana:

Child Care Center

Birth through 23 months 1:4

2 years through 3 years 1:8

4 years through 5 Years 1:10

6 years and over 1:14

Family Child Care 1:6

(no more than 3 children can be under the age of 2; 6 children maximum)

Group Child Care 1:6

(no more than 3 children can be under the age of 2; 12 children maximum)

Family, Friend and Neighbor (FFN)

In this more informal type of care, parent and legal guardian selects an individual, often a family member, friend, or neighbor, to care for all children in one family or up to 2 unrelated children.
